STUDENT Paul Reiners

COURSE Intro to Hadoop and MapReduce

Dear Paul,

Great job on this project! I'm completely impressed with just how neat you work is. I especially liked the visualizations and the extra work you did to make this project completely Udacious. Bravo!

Code Functionality   **Meet Specifications**

- All required project questions are correctly solved with the submitted MapReduce code.

Code Readability   **Meets Specifications**

- Your code overall follows a logical structure, and utilizes great comments.

Decision on Using   **Meets Specifications**
MapReduce/Hadoop

- Your response shows understanding of the main characteristics of Big Data.
- Your response gives appropriate recommendations based on information about the data source.

Search Improvement   **Completely Udacious**

- Your response shows understanding of index building, and provides an interesting approach on how to improve the inverted index.
- You provide actual code to show your creative idea in action.

Other Ideas about the   **Completely Udacious**
Datasets

- You are able to list one or more additional ways of processing the data with MapReduce, and you provide rationale behind using Hadoop.
- You provide actual code to show your creative idea in action

Project is Completely Udacious
